## Acknowledgments

This book is meant to help people learn card counting techniques for practical use in a casino. As such, the first group of people I wish to thank are the many beginners and dedicated blackjack students who helped review the early drafts of this book and contribute by experience to it's evolution. After many refinements to the exercises and improvements to our software, you have helped us make a training guide that truly helps 'want-a-bees' become experienced card counters at blackjack! Many thanks to Mike N., Fred D., Norman N., Jan T., and Jeff W.

Many thanks as well to David Matthews and Stanford Wong, whose expertise and vast blackjack knowledge made this book all the more professional.

Lastly, I'd like to personally thank my wife for her patience and support for this bizarre obsession that, surprisingly, manages to put food on the table.
